INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY PCT

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference P-2003-027WO	FOR FURTHER AC	TION	See Form PCT/IPEA/416				
International application No. PCT/DK2004/000796	International filing date (a 18.11.2004	lay/month/year)	Priority date (day/month/yo 26.11.2003	ear)			
International Patent Classification (IPC) or national classification and IPC G10K11/178							
Applicant OTICON A/S							
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 							
2. This REPORT consists of a total of							
3. This report is also accompanied b	A A AND EVER						
a. 🛛 sent to the applicant and to	a. 🗵 sent to the applicant and to the International Bureau) a total of 1 sheets, as follows:						
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).							
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.							
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)), containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).							
4. This report contains indications relating to the following items:							
☐ Box No. I Basis of the opinion							
☐ Box No. II Priority							
☐ Box No. III Non-establishm	rd to novelty, inventive step and industrial applicability						
☐ Box No. IV Lack of unity of							
☑ Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
☐ Box No. VI Certain documents cited							
	in the international appl						
☐ Box No. VIII Certain observations on the international application

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/DK2004/000796

	Box No.	I Basis of the report			
1.	With rega	Vith regard to the language , this report is based on the international application in the language in which it w iled, unless otherwise indicated under this item.			
	☐ This which	report is based on translations from the original language into the following language , h is the language of a translation furnished for the purposes of:			
 □ international search (under Rules 12.3 and 23.1(b)) □ publication of the international application (under Rule 12.4) □ international preliminary examination (under Rules 55.2 and/or 55.3) 					
2.	With regard to the elements * of the international application, this report is based on <i>(replacement sheets whi have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):</i>				
	Description	on, Pages			
	1-4	as originally filed			
	Claims, N	lumbers			
	1-4	received on 30.09,2005 with letter of 26.09.2005			
Drawings, Figures		s, Figures			
	1, 2	as originally filed			
	□ a sec	equence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing			
3.	☑ The	amendments have resulted in the cancellation of:			
		he description, pages he claims, Nos. 5			
	□ th	he drawings, sheets/figs he sequence listing <i>(specify)</i> :			
		any table(s) related to sequence listing (specify):			
4.	had not b	report has been established as if (some of) the amendments annexed to this report and listed belobeen made, since they have been considered to go beyond the disclosure as filed, as indicated in the lental Box (Rule 70.2(c)).	w he		
		he description, pages he claims, Nos.			
	□ tł	he drawings, sheets/figs			
		he sequence listing (specify): any table(s) related to sequence listing (specify):			
	* If 3	item 4 applies, some or all of these sheets may be marked "superseded."			

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

I. Reference is made to the following document:

D1: US-B1-6 445 799 (TAENZER JON C ET AL) 3 September 2002 (2002-09-03)

- II. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-4 is not new in the sense of Article 33(2) PCT.
- II.1. Document D1, which appears to be the closest prior art document, discloses (the references in parentheses applying to this document):

"A hearing aid (col.4, line 40) comprising a signal path with an input transducer (21), a signal processor (27) and an output transducer (22), where an auxiliary input ("external device" in figure 2) is provided to the signal path, the signal processor being adapted to produce a compensation signal capable of at least partly attenuating acoustic signals bypassing the signal path and entering the ear canal (col.4, lines 30-39)"

Claim 1 infringes thus Article 33(2) PCT.

II.2. Document D1 discloses also all the features of dependent claims 2-4 (see, especially, figure 2 and col.6, lines 33-38 wherein the term "turning knob" is considered to be the same as "switching means" in the wording of the claims).

Claims 2-4 infringe thus also Article 33(2) PCT.

I.L.Fülöp

CLAIMS

- 1. A hearing aid comprising a signal path with an input transducer, a signal processor and an output transducer, where an auxiliary input is provided to the signal path, the signal processor being adapted to produce a compensation signal capable of at least partly attenuating acoustic signals bypassing the signal path and entering the ear canal.
- 2. A hearing aid according to claim 1, where the hearing aid further comprises at least one internal input transducer for obtaining a sound signal within the ear canal, the internal input transducer being connected to the signal path.
 - 3. A hearing aid according to claim 1 or 2, where switching means are provided for switching the signal processor to a state where the compensation signal is generated.
 - 4. A hearing aid according to claim 3, where the switching means are adapted for automatically generating the compensation signal upon receiving the auxiliary input.
